Introduction & Problem Description

Tasks
→
Deadlines

Why don't I know
how to implement it ?

Thinking of the solution

- 1 Should I solve a lot of problems ?
- 2 Should I solve hard problems ?
- 3 What time should I spend in solving ?
- 4 What about challenging people ?
- 5 Leetcode ? Codeforces ? etc

Motivation

- [Competitive Programming Library](#)
- FCAI-ICPC Community
- Discord Bot Challenging
- Website -> Gaming Platform

Our Solution: Groofy Code

Project Idea

Highlight Features

1

Challenge Mechanism

2

Comprehensive User System

3

Clan Features

4

Interactive Chat System

Match Modes

- Various Coding Challenges
- Difficulty Levels

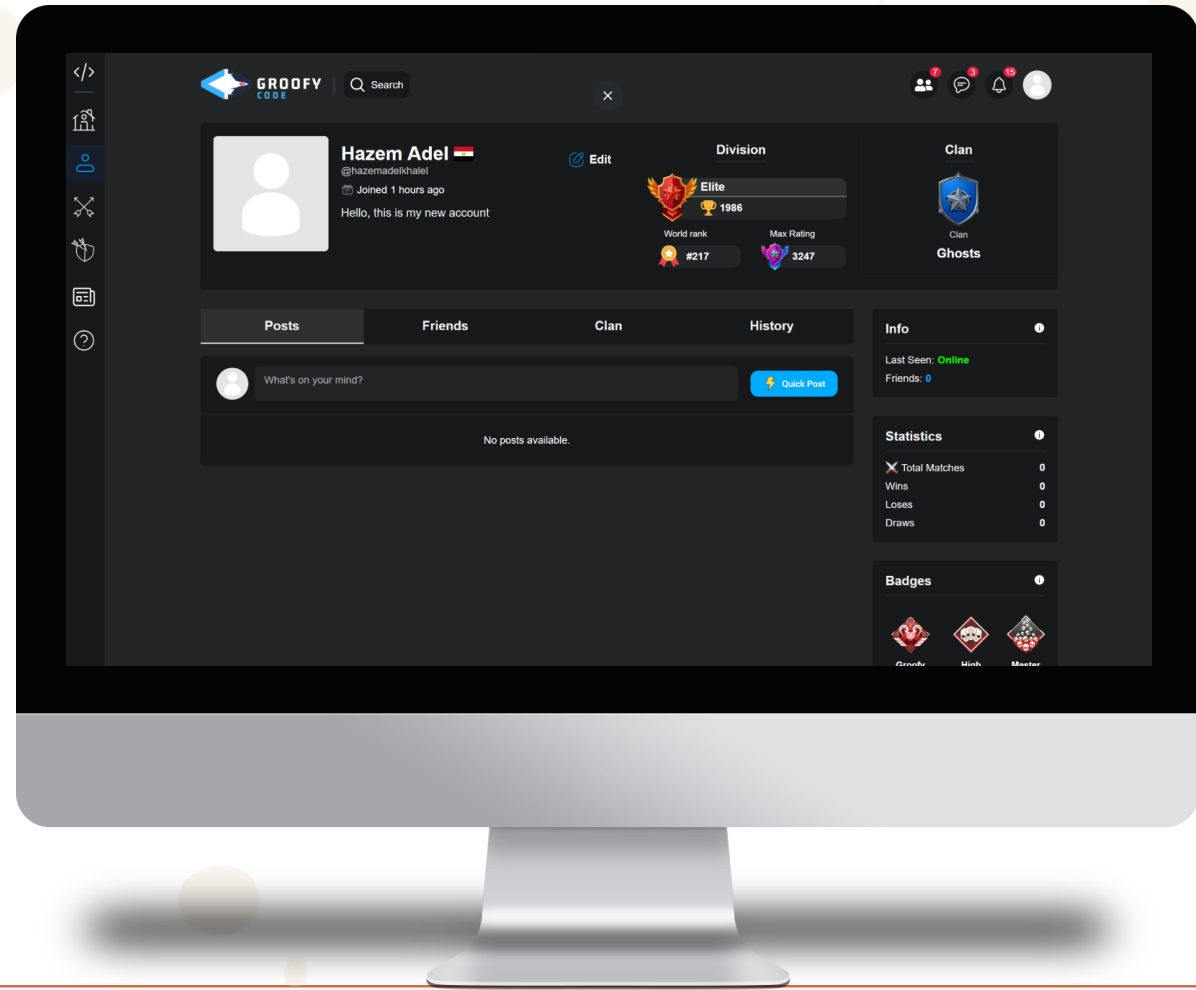

Match Challenge

- Real-time Code Editor
- Submission and Evaluation

User Profile

- User Registration / Login
- Profile Creation
- Personalized Dashboard
- Insightful User Statistics

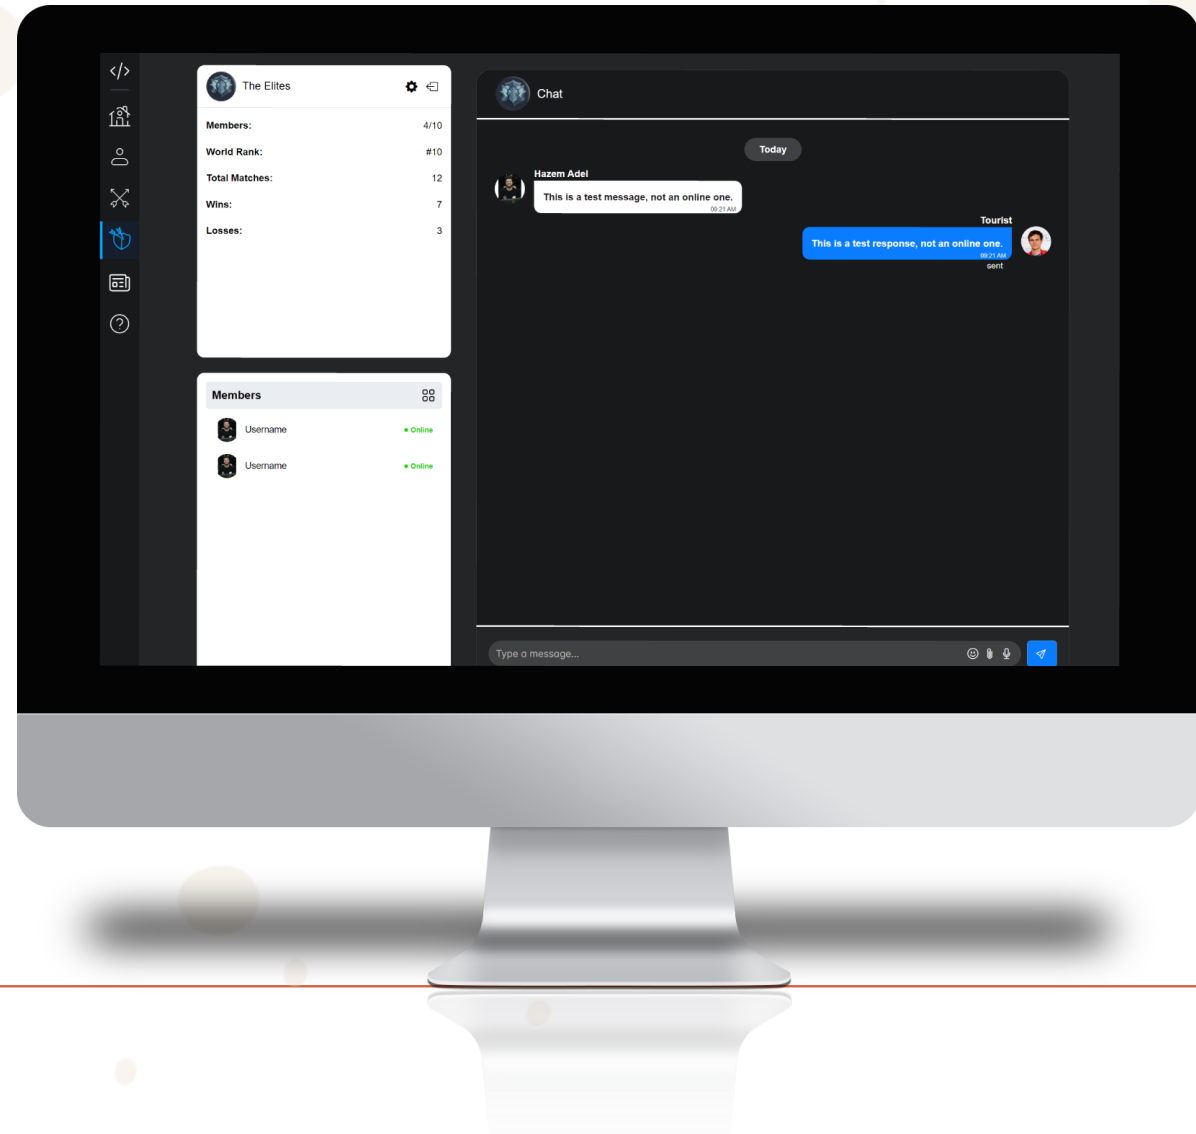

User Interactions

- View users' profile
- Friend Requests
- Notification system
- Invite a Friend to Match/Clan
- Posts

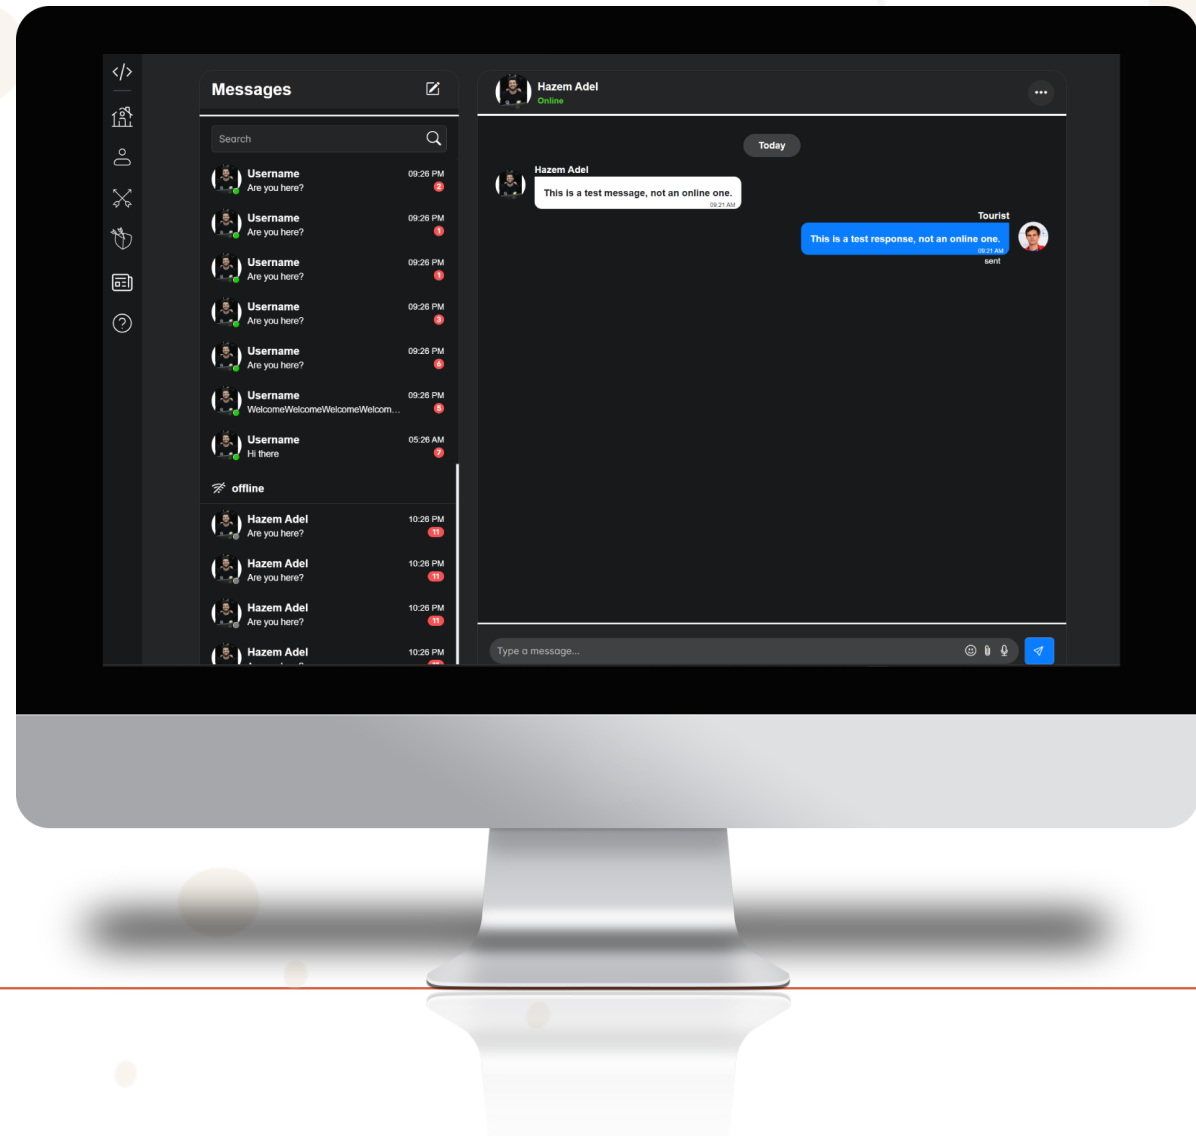

Clan Feature

- Viewing Clan members
- Collaborate with people
- Messaging members
- Play with them

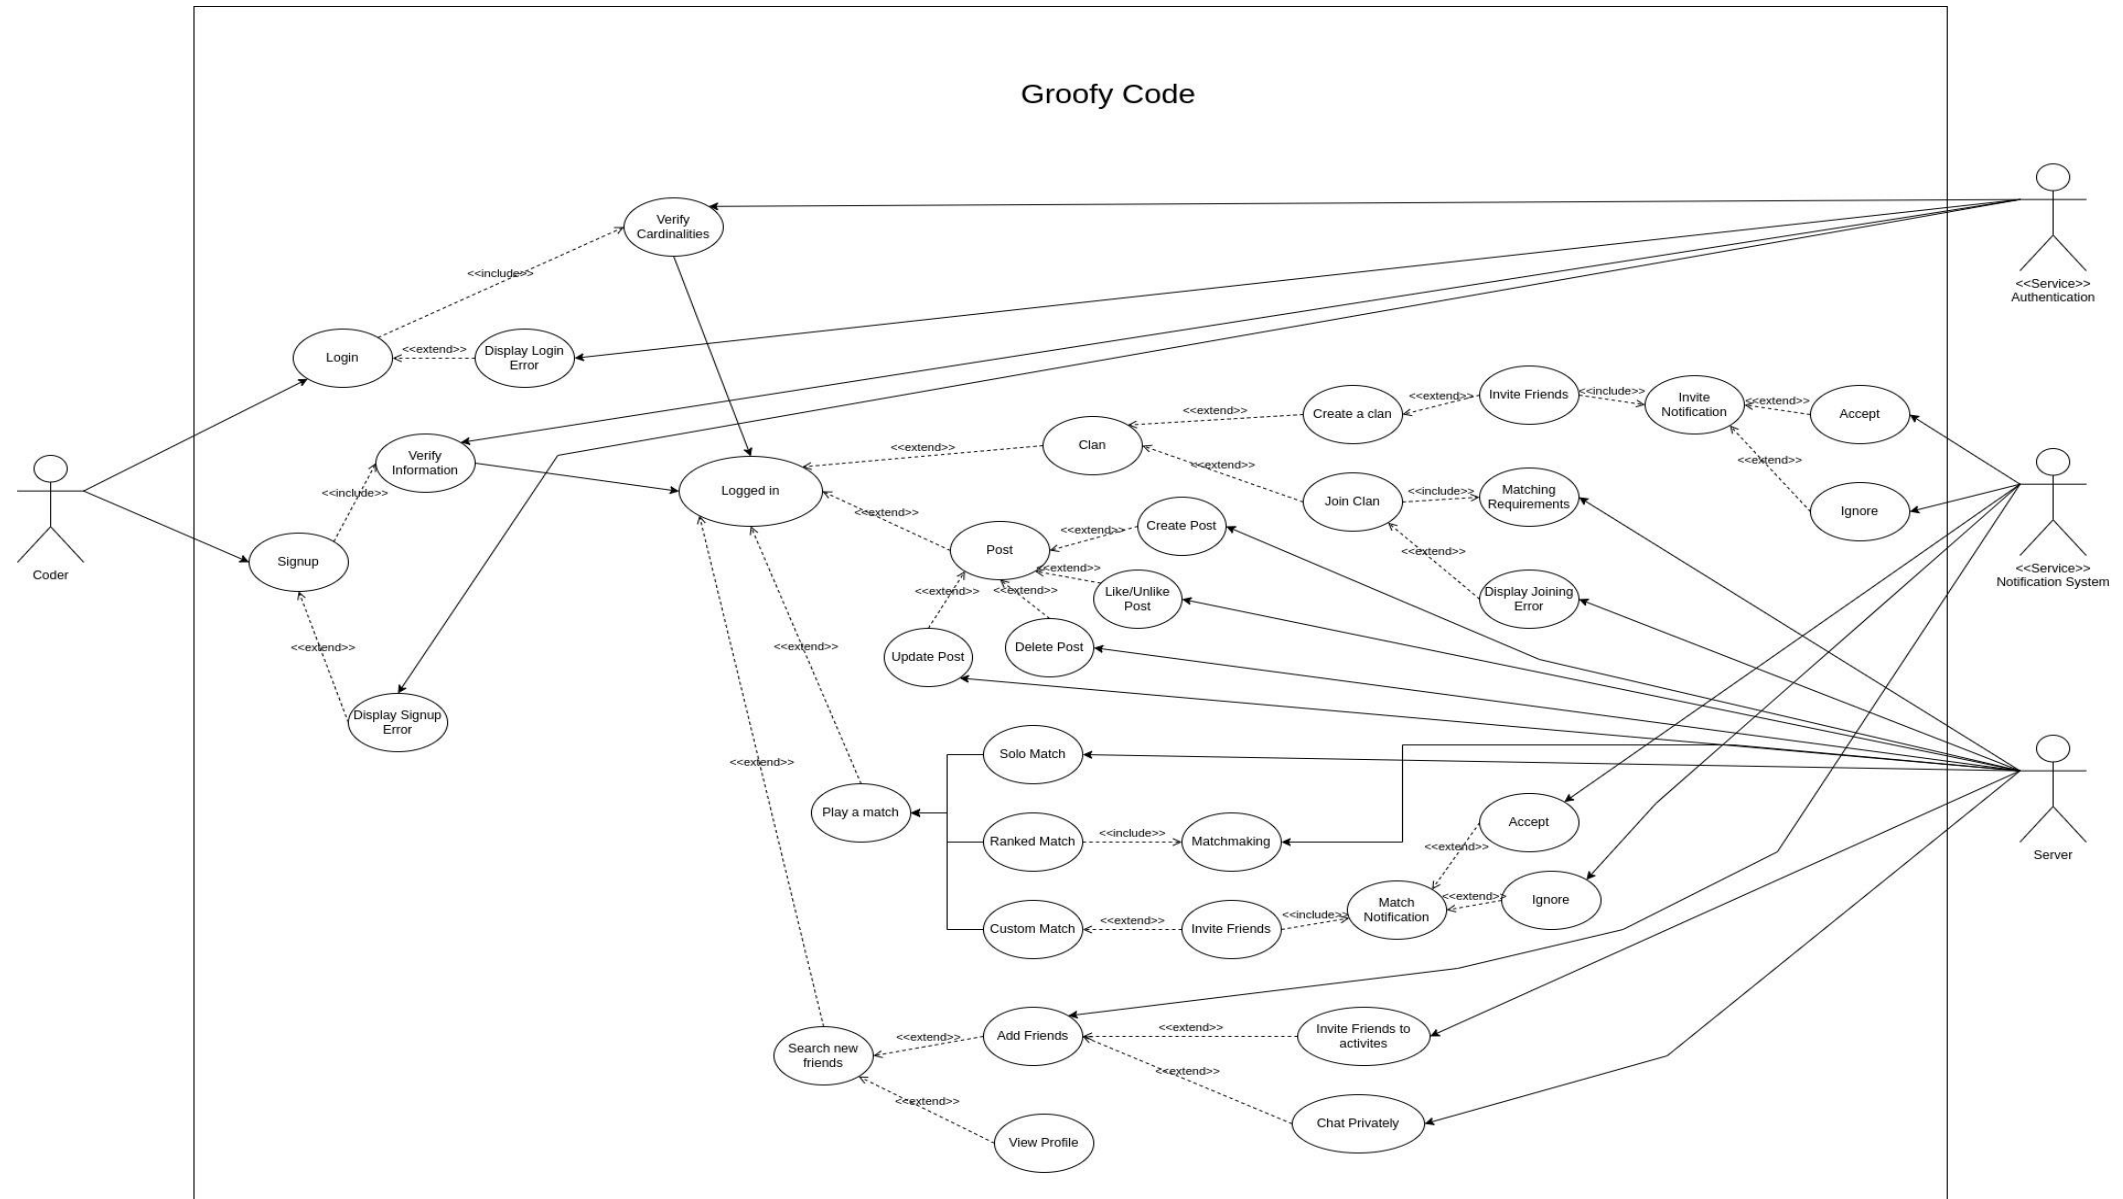

Chat System

- Viewing Friends
- Message a user
- Search for a friend

Use Case Diagram

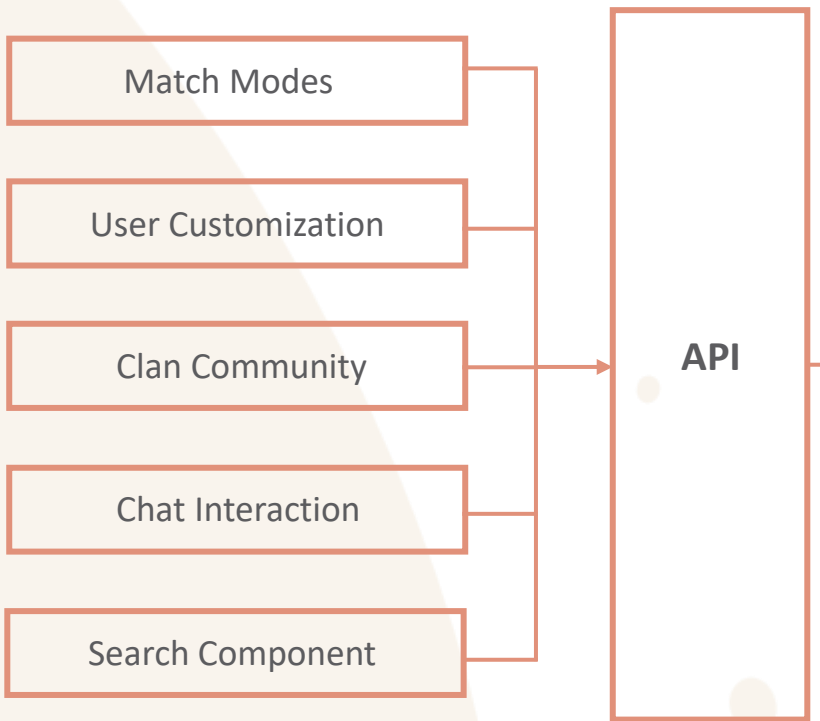

Project Specifications

Architecture

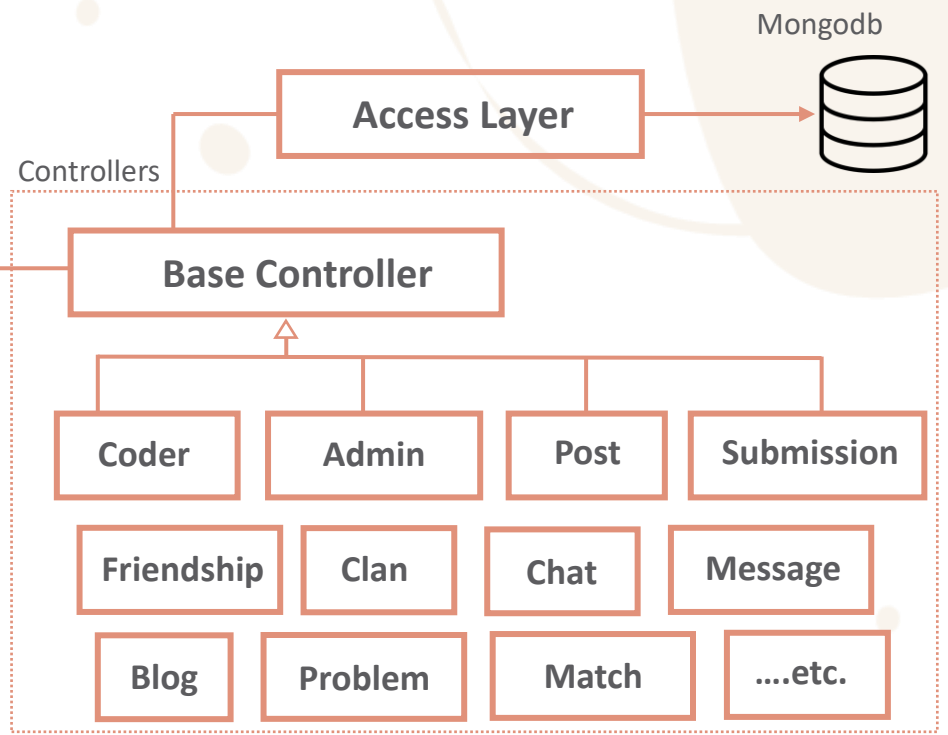

Frontend

Authentication

Backend

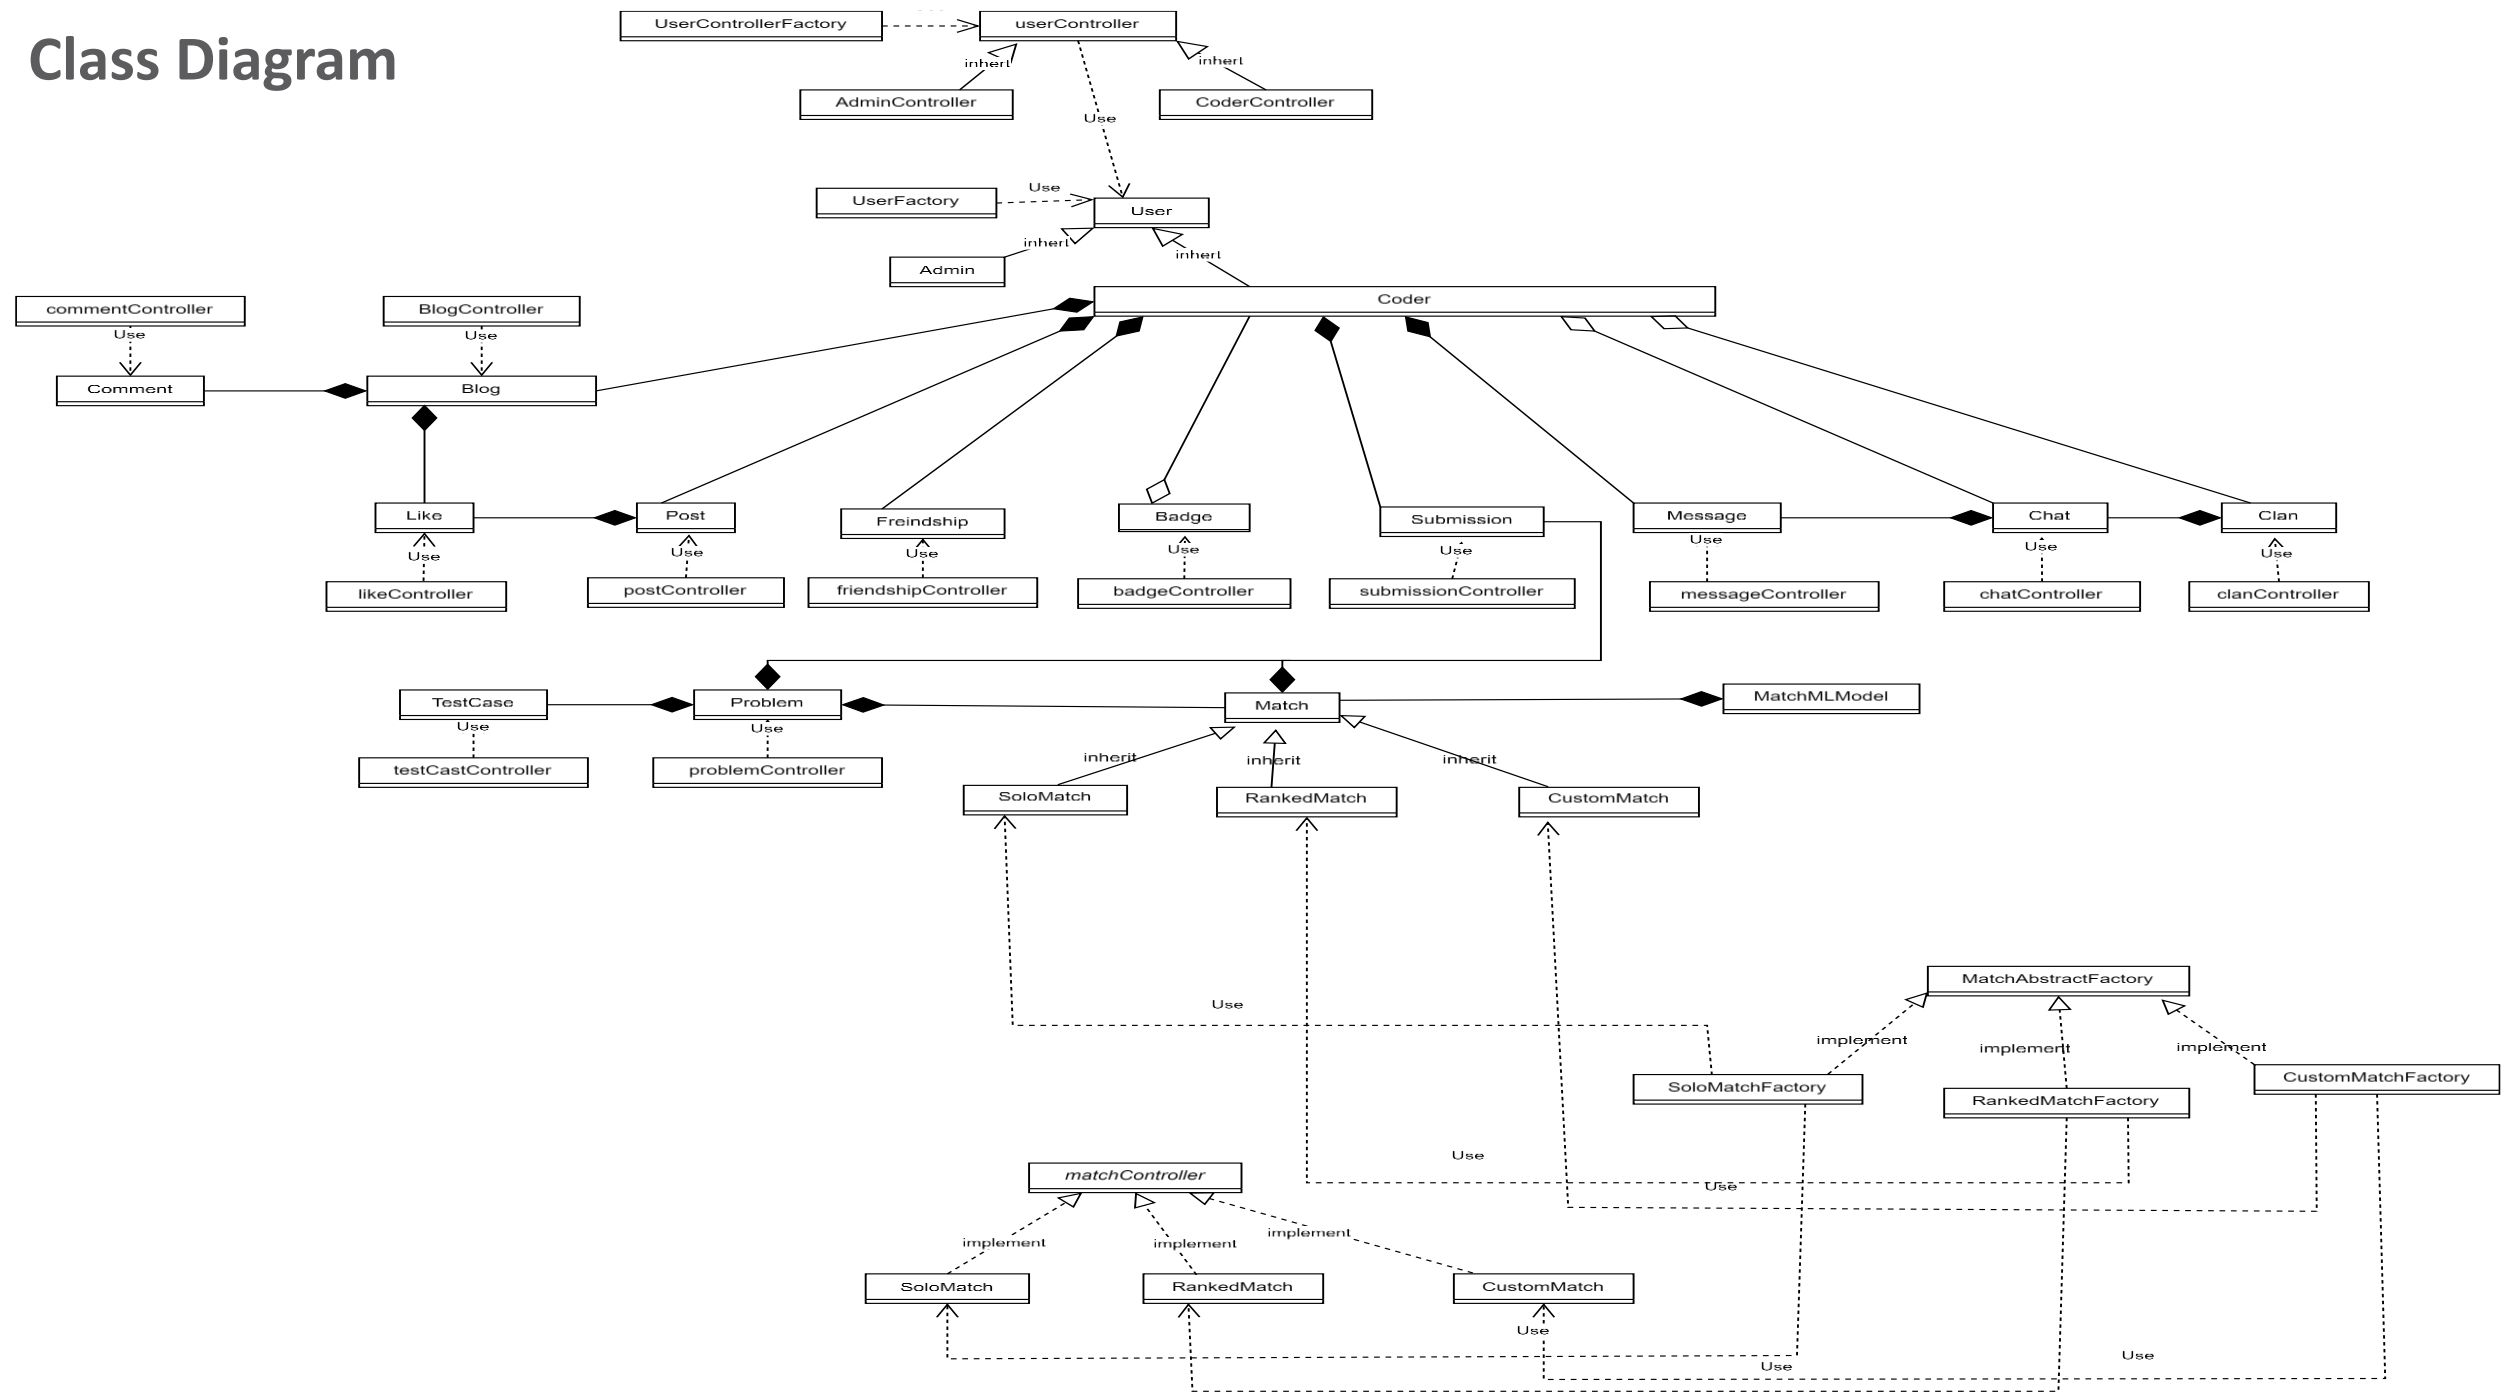

Design Patterns & SOLID Principles

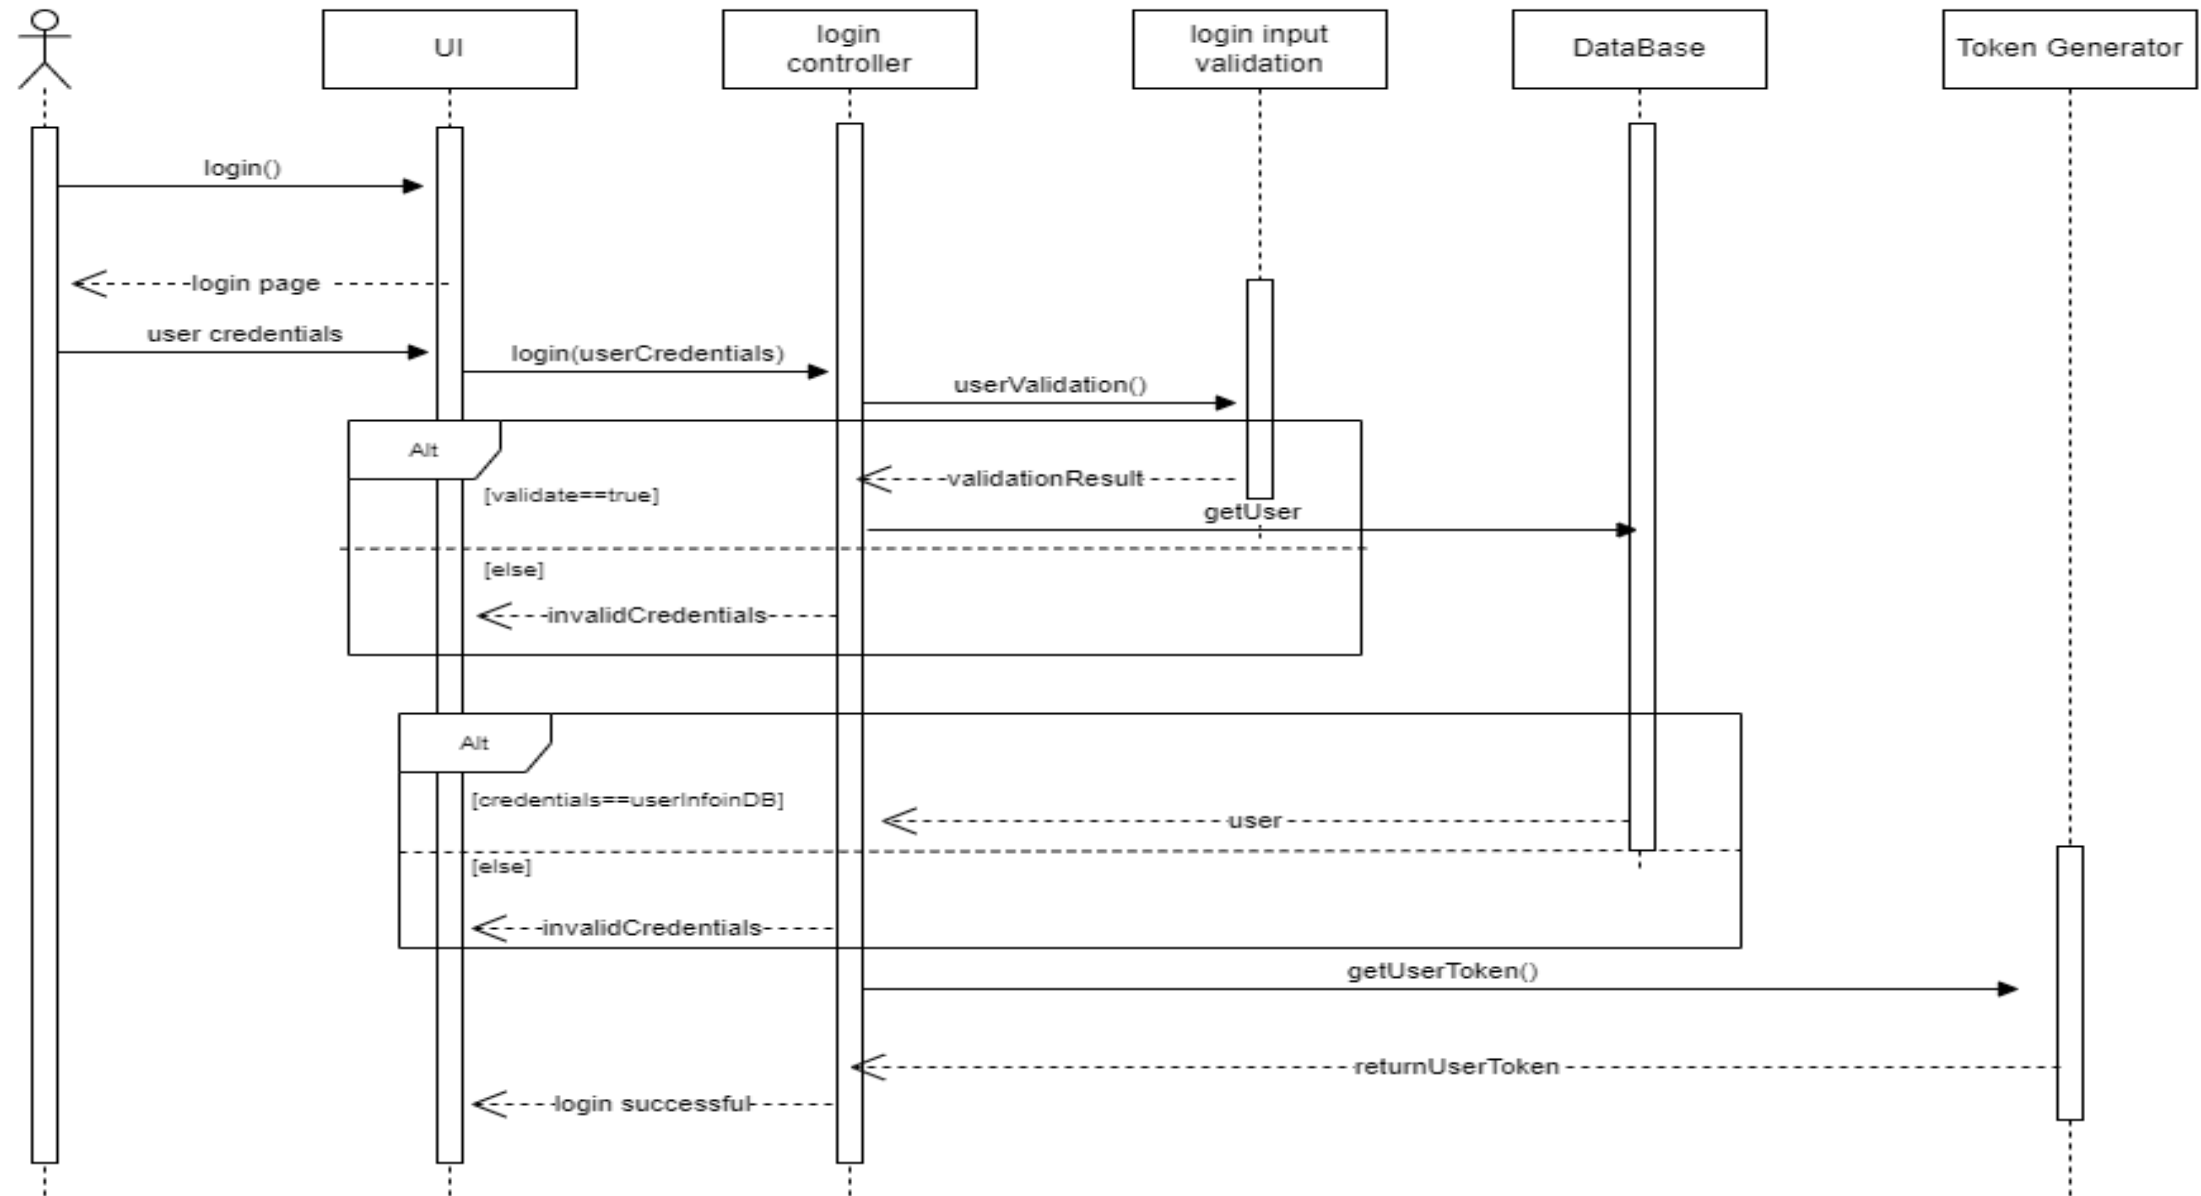

- Strategy Pattern
 - Match Controller
- Singleton
 - Controllers
- Abstract Factory
 - Match with Controller

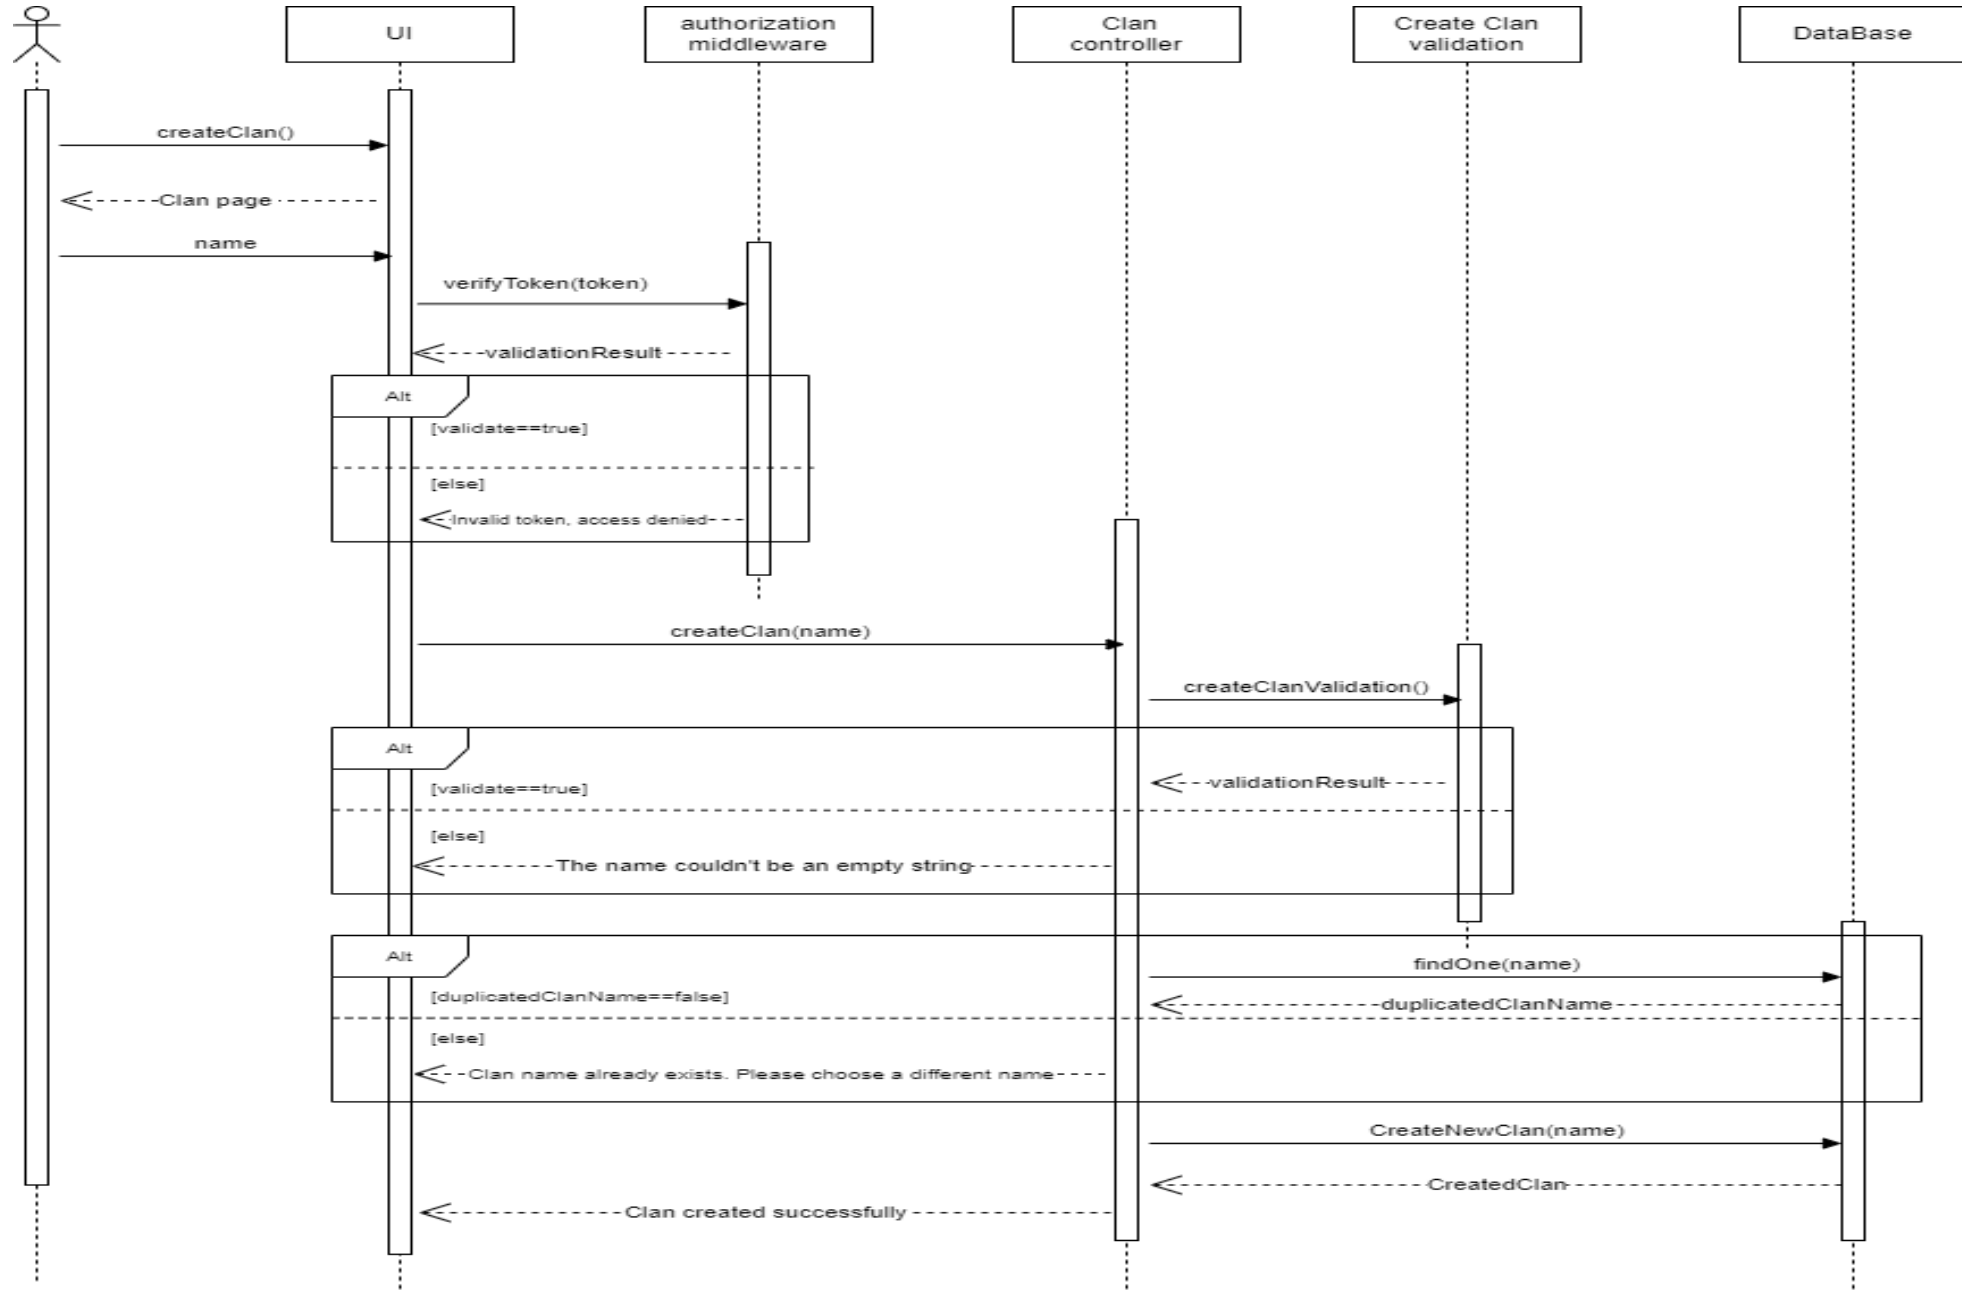

Class Diagram

Login Sequence

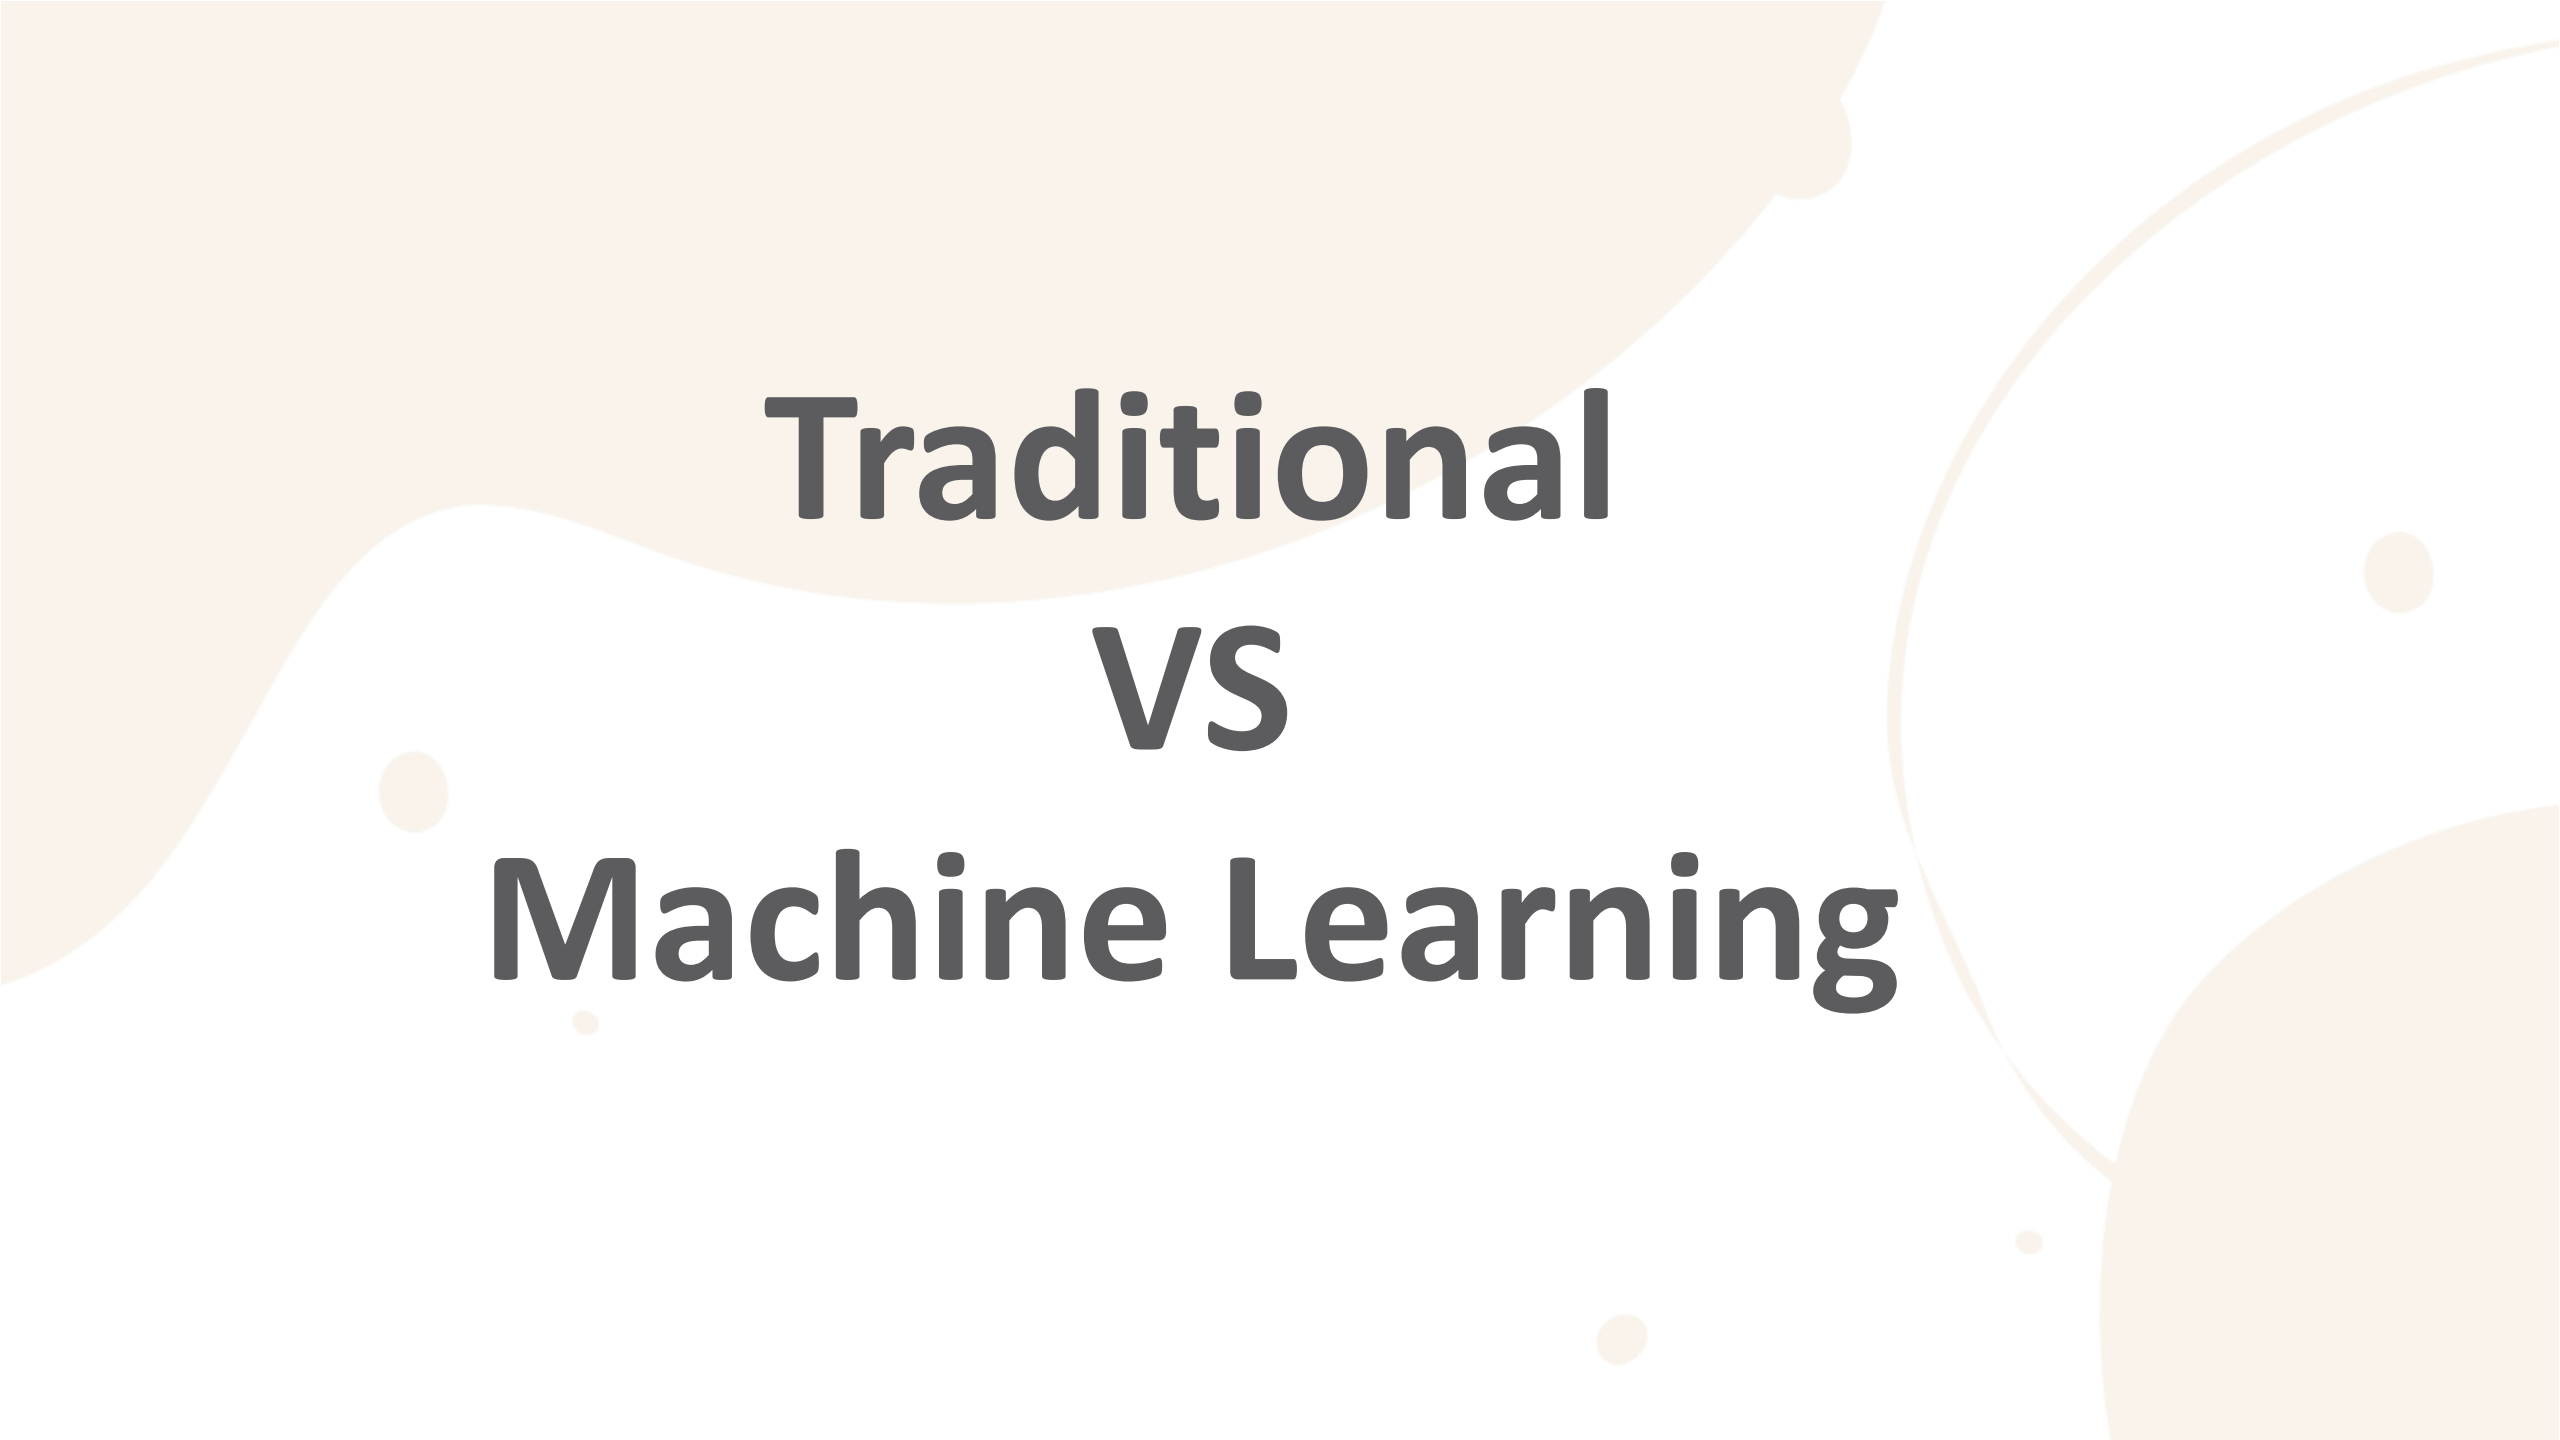

Clan Sequence

Non-Functional Requirements

- Scalability
 - Stable Server
 - Event-Driven & Non-Blocking I/O Backend
- Useability
 - Friendly User Interface
- Portability
 - Media Queries
- Performance
 - Single Page Application
 - Caching

Traditional VS Machine Learning

Why Machine Learning ?

- The Slow Improvement Problem
- Quantity vs Quality
- Reason for Slow Improvement
- Finding Suitable Problems for Individual Abilities
- Leveraging Machine Learning
- Matchmaking Problem

Our Model

- Problem Nature
- Recommendation System Type
- Similarity Scores Metrics and Implementation
- Solo Practicing Considerations
- Data Collection Methodology
- Feature and Target Variables
- Model Selection

Technologies and Libraries Used

- Backend

socket.io

mongoDB®

- Frontend

Challenges

- Lack of hands-on experience with used technologies.
- Integration with already existing website such as Codeforces, Codemirror and judge0
- Time & Collaboration constraints due to studies and work commitments
- Nodejs VS Java Spring boot

Time Plan

Gantt Chart

Conclusion

Conclusion

- Groofy Code aims to be a feature-rich and interactive online coding challenge platform.
- Encouraging users to improve their coding skills, compete in challenges, and foster a sense of community through clans and social features.

With a dedicated and skilled development team, we are confident in delivering a high-quality platform that will be a valuable resource for coding enthusiasts.
